ISTANBUL AKVARYUM

In comparison to other aquariums of its class containing fish species living in the world’s seas, it is the newest with its travel route, thematization, interactivity, rainforest and cutting-edgetechnology...

Istanbul Akvaryum holds a leading position among worldwide aquariums thanks to its volume, variety of fish species, and the activities on travel routes. It is a project which makes ‘firsts’ and ‘mosts’ in its field.

The visitors, by following a geographical route, travel on a route that hosts 17 themes and 1 rainforest going from the Black Sea towards the Pacific.

In thematization of the spaces, there appear cultural, geographical, historical and architectural properties of each space with suitable decorative elements, interactive games, movies, and visual graphics by which details about the region are provided. Sound and lighting systems of each space have been arranged in conformity with this thematization.

Istanbul Akvaryum is managed by specialists in their field and in compliance with internationalstandards in every sense.

All living creatures in Istanbul Akvaryum continue to live in the conditions as nearest as possible to those of their habitat.
